Welcome To La Spezia, Italy

La Spezia is located in northern Italy in a province of the Liguria region. La Spezia was originally inhabited in Roman times, but little is known of the history before 1276, when it was sold to Genoa by the Fieschi family.

In 1857, La Spezia became a naval headquarter after the transfer of the military fleet from Genoa in 1857. The area was severely damaged by World War II; however, the city has rebuilt itself and the mix of ancient and modern architectural styles can be seen throughout the city today.

Pisa was originally an Etruscan settlement in the 5th century BC. In 179 BC the town of Pisa became a Roman colony and was developed to be an important naval base. In the 11th century, Pisa was further developed into one of the most powerful Italian Maritime Republics. During the Middle Ages, the buildings that made Pisa famous were built such as the Duomo, the cathedral's bell tower and the well known Leaning Tower.

Florence was originally founded in 59 BC by Julius Caesar. Florence gradually assumed leadership and became a free republic in the 12th century. Florence's increase in wealth and power coincided with becoming one of the most cultural cities of the world. In the 15th century, Florence was ruled by the two most able members of the Medici family: Cosimo the Elder and Lorenzo the Magnificent. The Medici family left the entire family collection to the city where some of the most famous art collections can be seen today.

AN OVERVIEW OF FLORENCE

Founded by the Romans in the first century B.C., Florence began its rebirth after the decadence of the barbaric ages, in the Carolingian period, and reached its highest pinnacles of civilization between the 11th and 15th centuries, as a free city, balancing the authority of the Emperors with that of the Popes, overcoming the unfortunate internal dispute between Guelfs and Ghibellines.

In the 15th century, it came under the rule of the Medici family, who later became the Grand Dukes of Tuscany. This in fact was the period when the city was at the height of its glory in art and culture, in politics and economic power. The Grand Duchy of the Medicis was succeeded, in the 18th century, by that of the House of Lorraine, when in 1860 Tuscany became part of the Kingdom of Italy of which Florence was the capital from 1865 to 1871. In this century, the city has once more taken up its role as an important centre for culture and the arts.

Capital of the region of Tuscany, Florence has a population of around half a million inhabitants, spreads on the banks of the Arno, between the Adriatic and the Tyrrhenian seas, almost in the middle of the Italian peninsula. It is a city which bustles with industry and craft, commerce and culture, art and science. Being on the main national railway lines, it is easily accessible from most important places both in Italy and abroad. The climate is temperate but rather variable, with breezy winters and hot summers. The Chianti area, between Florence and Siena, is one of the most beautiful countryside's in Italy and a famous wine production area
